

Subject: New Horizon Meetup on Sep 30<sup>th</sup> 2015

30<sup>th</sup> Sep 2015: Updates on JQuery Case study

Total No of Attendees: 10

Goal of the Session:

To understand the progress of participants and to provide support and guidance on JQuery case study-Snake and Ladder Game.

To capture the feedback on first session and to plan for further sessions.

Here is the quick walk through of the session.

First of all we would like to thank all the participants making time to attend the session in spite of their busy schedules.

We had a walkthrough of case study Snake n Ladder done by one of the participant. Everyone shared their view on how to improve or restructure the code to make it more modular and also the participants could visualize the problem which imparted the confidence in them for completing the case study.

Further discussions was on the upcoming sessions in new horizon series and we planned for starting the training on JavaScript. Another session on GitHub was planned so that everyone can familiarize with GitHub usage which will help to share the updates and code.

We will look forward for the future sessions and great participation.

Thanks and Regards

Thushara
