Subject: New Horizon Series: The Technology Sessions – Session wise Updates

10th Nov 2015: Advanced JavaScript Concepts
Total No of Attendees: 20

Goal of the Session:
To provide participants a deeper understanding on JavaScript concepts.

Here is the quick walk through of the session.

First of all we would like to thank all the participants for attending the session and also would like to appreciate Vinayak for taking his time to conduct the session

The session started with a brief revise of the previous session on JavaScript fundamentals.

Following topics were covered in the session
1. Functions
2. Closures
3. OOPS
   a. Objects
   b. Prototype
   c. Inheritance

Participants were very much involved and interactive which made the session really informative. Few important concepts like scope chaining, closure, iffy functions were demonstrated which made it very clear for the participants. There were few queries from participants which was answered by Sameer and Vinayak.

We will look forward for the future sessions and great participation.

Thanks and Regards
Thushara
