Subject: New Horizon Series: The Technology Sessions – Session wise Updates

12th Oct 2015: Introduction to JavaScript
Total No of Attendees: 15

Goal of the Session:
To provide participants a walkthrough on JavaScript fundamentals and to ensure that the participants are clear on basic concepts which will help to build up on advance JavaScript concepts.

Here is the quick walk through of the session.

First of all we would like to thank all the participants making time to attend the session and also would like to appreciate Prashant for presenting the concepts in clear and concise way.

Prashant started the session with throwing light on how JavaScript emerged which was really a valuable information to the participants.
Following topics were covered in the session

- Introduction to JavaScript
- Variables
- Syntax
- Output
- Operators
- Array
- Object
- Functions

Participants were very much involved and interactive which made the session really informative. Few key concepts were demonstrated which made it very clear for the participants. There were few queries from participants which was answered by Sameer and Prashant.

We will look forward for the future sessions and great participation.

Thanks and Regards

Thushara
